10.1-inch tablets are becoming the norm these days, but what if you're looking for even more pills. What are your options, what's out there? No, we're not talking about convertible laptops or laptop hybrids. We only look at tablets that work regardless of keyboard or base. These great pills are still very many tablets in their hearts. It may have a keyboard dock or magnetic cover, but it's a device with a proper tablet profile, not just some ultra-book with a touchscreen that flips or twists in a tablet. If you're after those, check out the budget Windows Hybrid 2-in-1 for school tablets and laptops for Schools. The top 5 best Android tablets with LARGER than the 10-inch Display We have found 8 Android tablets with screens larger than the standard 10-inch or 10.1-inch. Most of them are direct alternatives to the iPad Air 10.5-inch and iPad Pro 11-inch. Samsung is pushing the envelope by offering the Pro-level equivalent with the Galaxy Tab S7 and S7 with a 12.4-inch option to go against the iPad Pro 12.9 inches. Use the links below to access tablets on Amazon. UPDATE: Samsung Galaxy Tab S7 11-inch and Samsung Galaxy Tab S7 12.4-inch and Samsung Galaxy Tab S6 Lite 10.4 inch Other tablets with larger than 10-inch Display A Closer Look Now for a more detailed look at each of the tablets. UPDATE: Samsung Galaxy Tab S7 11-inch and S7 12.4-inch Last Generation Galaxy Tab S are now available in two sizes, following in Apple's footsteps with their iPad Pro series. The Galaxy Tab S7 is an 11-inch device, while the Galaxy Tab S7 is a 12.4-inch device that reflects Apple's offerings, the iPad Pro 11-inch and the 12.9-inch. But that's not the point. Samsung also offers the newest ultra low-delayed S Pen as part of the purchase, so not only do you save on the cost of the device itself, but also on the S handle compared to the iPad Pro and Apple Pencil 2. Finally, an Android tablet larger than a 10-inch tablet that can go against your own iPad Pros. Complete with S Pen and an additional Book Cover keyboard, it's a viable alternative to professionals. It even comes with the option of connecting 5G to the S7. Enough with comparisons, let's take a look at what the Galaxy Tab S7 has to offer. Both displays offer silky smooth stutter free movement with a high 120Hz upgrade rate. There is a catch however, the 11-inch S7 uses the LTPS LCD panel while the S7 has a more superb Super AMOLED display. Both offer many details on 276ppi and 266ppi respectively, brightness and wide color scheme. Running on the mobile platform qualcomm Snapdragon 865 Plus, you have the option to choose between WiFi, 4G or ultra fast 5G connectivity, with the price premium on the 5G model. Samsung Galaxy Tab S7 plus Super AMOLED Display On the back of the tablet is a pair of cameras, a 5MP camera with an ultra wide F2.2 lens and a basic 13MP camera with wide-angle wide-angle Both cameras are capable of recording up to 4K resolution video at 30fps. Use different modes of shooting for best results; one take, night mode, night hyperlapse, front and back recording of the conversation, scene optimizer and AR doodle. It also offers PC-like DeXmode and multi-window support for multitasking. Pair this with an additional book cover keyboard with an onboard touchpad, and you have yourself a replacement laptop. Samsung Galaxy Tab S6 Lite 10.4-inch newcomer to the Android tablet scene, the Galaxy Tab S6 Lite takes the winning formula from the Galaxy Tab S6 and make it more affordable. Along the way, it has also fixed some of the issues that plague premium tablets, such

as the ability to magnetically attach and charge the S Pen on the edge of the tablet compared to the rear of the chassis.1. Samsung Galaxy Tab S6 10.5-inch - FAST processor, STYLUS, more RAM and STORAGESamsung Galaxy Tab S6 on The AmazonGalaxy Tab S6 is a premium tablet with a 10.5-inch device. The tablet comes with a new stylus that snaps on the tablet magnetically just like the new iPad Pro and has narrow framing on all sides but not rounded corners on the display. As for the stylus, it charges, latch on to the back of the tablet, a strange place, but with a smart lid comes with molded storage to keep it in place. The Samsung Galaxy Tab S6 with an extra keyboard cover that comes with a trackpad on AmazonThe's flagship tablet features a bright Samsung AMOLED display wrapped in an all-metal chassis. There is also an optical fingerprint scanner under the display. Overall, it's very similar to the Tab S5e below, but powered by the flagship Snapdragon 855 chip and comes with more memory and dual storage. But what also makes it stand out from other tablets is the use of a dual main camera, the first on a tablet of this size. Samsung Galaxy Tab S6 Double Main CameraKey Features and DetailsSamsung Galaxy Tab S6Samsung Galaxy Tab S5eDisplay10.5-inch Super AMOLED10.5-inch Super AMOLEDProcessorSnapdragon 85 5S Napadragon 670RAM6GB/8GB4GB/6GBStorage128GB/256GB64GB/128GBRear Camera (s) 13MP and 5MP13MPFront Camera8MP8MPSpeakersQuadrbattery7,040mAh7,4040mAhWeight420g400gDimensions24.5 x 159.5 x 7.7mm 245 x 160 x 5.5mmFingerprint ScannerIn-displaySide-mountedS Pen SupportYYesNoRELATED: Samsung Galaxy Tab S6 10.5 inches vs. Apple iPad Air 10.5 on Color My Tech2. Samsung Galaxy Tab S5e 10.5-inch - SLIMMEST and LIGHTESTTaking signals from the new generation iPad with thin and even framing throughout, the new premium Galaxy Tab S5e has a large 10.5-inch display built into a small frame. The tablet is fast becoming a crowd favorite with a stunning new design, powerful processor, high-resolution Super AMOLED display, quad speakers and a durable battery. Samsung Galaxy Tab S5e on AmazonPowered by SDM670 Octa-Core processor with At 1.7GHz and 2.0 GHz, the tablet is available with 4GB of RAM and 64GB of ROM storage or 6GB of RAM and 128GB of RAM. For more information up to 512GB, use the microSD slot. But what amazes us most is the stunning new premium design. Measuring only 5.5mm thick, it's thinner than the iPad Pro's 5.9mm, weighing less than 400 grams compared to the 468 grams (11-inch iPad Pro). Like its predecessor, the Tab S4, the new Tab 5e has a quad-core installation speaker customized by audio manufacturer AKG and powered by Dolby Atmos technology for incredible 3D surround sound. He also shares the same pair of cameras; 13MP rear camera and 8MP front camera for selfies, web chat and facial recognition. One thing that sets it apart from the usual kick specification is the added fingerprint sensor to the power button. However, while it maintains a productive interface like the PC with the Samsung DeX, it doesn't come with a stylus like the Tab S4. Samsung Galaxy Tab A 10.1-inch - GOOD VALUE, SLIM and LIGHTWEIGHT, GOOD TIME New Galaxy Tab A shrunk in size. With a display measuring 10.5 inches, this latest iteration now spots a smaller 10.1-inch display. Samsung is trying to cover all market segments and the Samsung Galaxy Tab A is one for the entry-level range. Available in black, silver and gold, this latest offering from Samsung uses a new screen ratio of 16:10 compared to the previous Tab A 9.7-inch at 4:3 to distance itself from the likes of the iPad. The 10.1-inch display is packed with lots of pixels. On Full HD or 1200 x 1920 pixels, this is a very welcome update. The Galaxy Tab A 101 on AmazonThe tablet is powered by a mid-range Exynos 7904 processor, an octa-core processor with speeds of up to 1.8 GHz. It also just has a standard LED panel with IPS technology instead of Samsung Super AMOLED panel, reducing the cost of the move. However, the display now has a narrower bezel wrapped in a premium metal chassis not common on budget devices. To bring it in line with today's tablets, it got a memory and storage boost, up to 3GB of RAM and 128GB of storage. The battery is on a much respectable 13 hours of WiFi plus a cellular (4G) model also available. Key features and detailsProcessor: Double 1.8 GHz and Hexa 1.6 GHz Exynos 7904Screen: 10.1-inch Full HD 1080p 1920 x 1200 pixel LCD displayMobility: 2GB/3GB DDR3 - MORE MEMORYOS: Android 9.0TOORAGE: 3GB DDR3 - MORE MEMORYOS: Android 9.0Storage: 3GB DDR3 - MORE MEMORYOS: Android 9.0Storage: 3GB DDR3 2GB/64GB/128GB eMMC storageExpansion: MicroSD map expansion to 512 GB Camera with 1080 FullHD video capture supportBattery: 6150 mAh Li-ion battery with up to 13 hours of use (Internet) - GOOD TIME LIFE4. Huawei MatePad Pro Tablet 10.8-inch - BIG DISPLAYHuawei high-end tablets take on a new name, the MatePad series offer small framing up to 4.9mm and rounded angular displays to rival those of those Samsung and Apple. It is also one of the cheapest when compared to both for light. The MatePad Pro is the largest of the two offerings of the same name comes with a 10.8-inch display while the MatePad has a 10.4-inch display. Huawei MatePad Pro2 tablet can have a similar design and appearance, underneath them tells a different story. The MatePad Pro features the flagship Kirin 990 chip with 6GB of RAM and 128GB of storage. Compare that to the MatePad, which uses a Kirin 810 chip, 3GB of RAM and a small 32GB of storage. Aside from the problem of not being able to access Google Mobile Services out of the box (there are ways to get around that you have an existing Android device to port out) the tablet packs a lot of delightful features. There is a 2K FullView display, 12 hours of battery life, quad-core firing speakers with Histen 6.0 3D stereo tuned Harman Kardon Audio. On the back you will find a 13MP rear camera and 8MP front-facing camera and support support for the 20W SuperCharge, as well as wireless charging and reverse charging. As the premium tablet goes, the MatePad Pro supports the stylus and keyboard. However, M-Pencil Stylus and Smart Magnetic Keyboard are not included in purchase.5. Huawei MediaPad M5 10.8-inchThe MediaPad M series is a medium to high range tablet from Huawei while the MediaPad T series is an entry-level variety. The M5 is the largest tablet in our lineup with a large 10.8-inch display. Wrapped in all metal curved chassis and 2.5D glass, the panel offers many details in 2K resolution with ClariVu technology, intelligent algorithms that correct obscure frames or drops in contrast ratio to provide a better viewing experience. Huawei MediaPad M5 on AmazonFor Audio, tablet uses quad-firing digitally enhanced speakers to deliver high-quality sound tuned harman cardon. It supports industry-standard Hi-Res audio pumping out clear high notes and more powerful bass minus distortion. The 7500mAh battery capacity does not last as long as Samsung's tablets, but long enough with up to 12 hours on full charge. It supports fast charging takes just 2.9 hours to fully recharge. Together with the included S-Pen Stylus and the extra purchase keyboard cover, the capable tablet can be turned into a hybrid laptop with a PC-like user deX. You'll also be happy to know that the included S-Pen is a full-size life pen rather than a pokey pointer. Samsung Galaxy Tab S4 on AmazonThe premium tablet is designed to perform both performance and entertainment tasks. Samsung DeX, which first appeared on Galaxy smartphones, works great here without the need for a DeX station or DeX Pad. All you need is an HDMI adapter to connect to the big screen, keyboard and mouse for a full desktop experience complete with a task bar, fast launcher, desktop multitasking and a large window interface. Even on standby, the screen can be used as a scratching pad for notes using the Screen-Off Memo feature. Get your notes quickly using the multifunctional S-Pen enabled. When at home, turn it into a smart home display to show the time, weather, calendar, favorite photos and access of Google Assistant or Bixby Voice.Beyond performance apps, the Galaxy Tab S4 is a premium Samsung tablet with a super crisp 10.5-inch SuperAMOLED display on the xd, thin bezel, though not as thin as the Tab 5e and quad-core speaker installation and Dolby Atmos for a true There are two storage configurations available: 64GB or 256GB with Wi-Fi or Wi-Fi and LTE only. Unlike the Apple Pencil, the S-Pen stylus doesn't run without battery life and doesn't require charging, but is still capable of hovering and clicking with special Air Command performance tools. Key features and parts10.5-inch 16:10 ratio sAMOLED display 2560x1600 pixels with minimal bezelPowerful Octa-Core (2.35Ghz quad-core processor 1.9 GHz quad-core processor) processor 4GB of RAM and 64GB or 256GB of ROM with up to 400GB of additional storage using the MicroSD slot. The quad-core speakers configured by AKG, which automatically rotates to offer a real stereo output based on the use13MP rear camera, an 8MP front-facing camera with a UHD 4K (3840 x 2160)@30fps capture a capable7,300mAh of large battery capacity up to 16 hours of video playback, 200 minutes of fast chargingDepartment: 249.3 H x 164.3 W x 7.1 D mm Weight: 483 gramsSamsung Galaxy Tabs 10.5-inchNext we look at Samsung tablets below, putting this side side on side to try to understand Samsung's move to introduce three relatively similar tablets for the high end segment at the same time. Samsung GalaxyTab S 10.5 vs Samsung Galaxy TabPRO 12.2 vs. Samsung Galaxy NotePRO 12.2Samsung started with a big-screen Android tablet race with a Samsung Galaxy Note PRO 12.2 inches and a Samsung Galaxy Tab PRO 12.2-inch both high end android tablets in early 2014. They then decided to release another high-end tablet, the Samsung Galaxy Tab S with a 10.5-inch Super AMOLED display. Such is the demand for big screen tablets on the market with manufacturers offering not one but three with very similar specifications or Samsung is trying to carve out a niche for itself. While the 10.5-inch may not sound very large from the standard 10.1-inch screens, that .4-inch actually translate to a larger area. All three tablets while one with a smaller screen at 10.5 inches and the other on displays 4MP or 2560 x 1600 pixel (WXGA) packages. Other than that, however, the tablets are not very different, as you will see from the quick comparison tablets below. The only obvious difference is that the Note PRO has an S-Pen stylus option and the Tab S has a high contrast and dynamic Super AMOLED display. True to play the color of the life display is said to be 94% of adobe RGB's color scheme compared to normal LCDs at 73%. All three Samsung Galaxy tablets are built on the same Octa-Core processor, a quad-core 1.9GHz Cortex-A15 and a quad-core 1.3GHz Cortex-A7 (Exynos 5420). The power management system and processor are smart enough to switch between different cores depending on what you do on your tablet. While the storage size options may be different, each one has 3GB of memory, which is great for the tablet and shares the same camera, 2MP automatic focus front camera and 8MP (3264 x 2448) automatic focus rear camera with Full HD video capture capabilities, geo-tags, dual camera operations, panorama and HDR. Size wise as 12.2-inch tablets spot a single profile and a body with a very similar weight. Note PRO scales about 16 grams more by 750 grams, and we can attribute this to the S-Pen stylus. As for the Tab S with its smaller screen at 10.5 inches, it's the lightest, smallest and thinnest compared to others. The only downside to the Galaxy Tab S is that it only comes with 16GB of on-board storage while the Galaxy Tab PRO and Galaxy Note PRO both starts with 32GB of storage, doubling that of the Galaxy Tab S with a 64GB storage option also available. All three tablets run on Android 4.4 KitKat. See the Top 10 things you should know about the Samsung Galaxy Tab S to learn more about the Tab S.Samsung Galaxy Tab A 10.5-inch - FAMILY FRIENDLYThe Samsung Galaxy Tab A 2018 is an entry-level company tablet priced at just about a third of the premium Tab S series. Even so, it comes with a huge 10.5-inch display, albeit in lower resolution rather than Super AMOLED panels, wrapped in a thin bezel and accentuated with quad-core firing speakers that support the Dolby Atmos surround. The Samsung Galaxy Tab A on AmazonThe Samsung Galaxy Tab A is a very good value, family-friendly and will meet the needs of most users as a round tablet for the consumption of streaming media, gaming and app usage. The tablet is designed for families and homes with features such as Kids mode and Daily Board for smart home displays. It supports a multiplayer mode that allows each family member their own tablet experience. Using a separate account with up to eight additional users, each user can change and save settings according to their own preferences. It has the same 7300mAh large-capacity battery seen in the Tab S4 with up to 15 hours of full-charge video playback and supports 3.5 hours of fast charging. Elsewhere, you'll get an 8MP main shooter and a 5MP front shooter, WiFi only or WiFi and LTE. The new edition of 2019 has a smaller 10.1-inch display and an even smaller frame and still spots the same family interface with Kids Home and Family Group Sharing. Li-ion 11.3v 5700mAhDual Band WiFi 802.11 a/b/g/n/ac 2.4GHz - 5GHz VHT80, WiFi Direct, Bluetooth 4.1 (A2DP, AVRCP, HSP) GPS, GLONASSB 2.0, 3.5 mm stereo socket, microphone, rich stereo sound from powerful speakers with audio streaming music PlayerDimensions - Weight: 17.79 x 10.86 x 0.47 (452 mm x 2 76 mm x 11.9 mm) and 5.84 lb (452 mm x 276 mm x 11.9 mm) and 5.84 pounds (2.65kg)Android 5.1 LollipopCML Rating : 5 starsWhat do we like, WHAT WE LIKEGOOD BATTERY LIFE BUILT-IN KICK STAND, WHAT DOUBLES AS HANDLE FOR STREAMINGPERFECT TOP-PLAY FOR PLAY AND STREAMING VIDEOALL-in-one DesktopsHP Slate 21 Pro All-in-One 21.5-inch - PC PROFILEThis is not really a tablet Slate HP 21 is not portable, nor thin, but we love the idea of a large touchscreen device that you can work with or mouse. This is HP's attempt to turn a friendly and familiar Android tablet into a desktop PC, which they dubbed All in One (AiO). Whoever the OS is currently integrated into cars, homes, printers, media centers and Smart White Boards.Powered by NVIDIA Tegra 4 processor and NVIDIA GeForce GPU, AiO has a 21.5-inch Full HD touchscreen on 1920 x 1080 pixels resolution makes it great for streaming 1080p video, viewing photos and viewing web pages. We have seen this used as an information kiosk in shops and offices. The built-in stand supports AiO in standing or next to the apartment in surface mode (between 15 to 70 degrees). What you need to knowNvidia Tegra 4 quad-core processor T40S Processors (1.66 GHz - dual-core/single-core mode up to 1.8 GHz)2GB of RAM, 16GB storage expandable with MicroSD to 32GB21.5-inch Full HD IPS Touchscreen 1920 x 1080 pixel resolution 16.:9 Aspect Ratio, 2 point optical touchscreen using 3 cameras, up to 178 degree angle viewCamera: Front webcam 720p Battery: NA WiFi, Bluetooth 4.0, WiFi Direct, Integrated 10/100 Ethernet, USB 2.0 x 3 PORT, HDMI entry x 1, USB 2.0 upstream port x 1, HP USB keyboard and HP USB optical mouse scrolling. Size and weight: 53.1 x 8.25 x 36.6 cm, 5.97 kgAcscive color: black or 4.3 Lollipop with native work profiles (Android for WorkALSO: Apple iPad Pro 12.9-inch Alternative to the big screen Android tablets we have on the Apple list is Apple Apple tablet offer, Apple iPad Pro 12.9 inches. Don't let the price put you off if, as it comes with lots of properties, support a stylus and that distinctive Apple iPad design, build quality and premium look. The 2732 x 2048 pixel screen resolution at 12.9 inches is one of the highest resolution on our list and the high-end display can't get any better than this as the screen has the same color space as the wide color scheme, including greater color saturation than any previous iPads. Unlike its smaller counterparts, the iPad Pro 12.9 has 4 speakers, one in each corner of the tablet. Performance wise, it has the processing power to fit even a workstation or PC still capable of lasting up to 10 hours. Connect it to the keyboard and you have a laptop and PC replacement machine; Truly portable 2-in-1 device.12.9-inch Retina LED backlit Multi-Touch display 2732-by-2048 resolution at 264 pixels per inch (ppi)A9X chip with 64-bit architecture, Built-in M9 coprocessor8MP iSight Camera with Full HD video recording capability, Slo-mo (720p at 120 fps), Video Audio Stabilization and more1.2MP FaceTime HD camera with 720p HD video recording4 speakers, dual microphone, digital compass, WiFi, iBeason microlocation and for Wi-Fi and cellular model; Help GPS and GLONASS, CellularTouch ID, triaxis gyroscope, accelerometer, barometer, ambient light sensor10 hours of battery life (WiFi), 9 hours (WiFi and cellular models)The ultimate thoughtsThy don't dare go beyond the gold standard 10.1-inch display size for Android tablets, trio manufacturers; Samsung, Lenovo and Toshiba featured here performed it pretty well. Our favorite Samsung Galaxy Note PRO 12.2. The S-Pen on a screen of this size turns the tablet into an effective sketch pad and graphics tablet. The 10-point multi-point screen still works like any other tablet listed here, giving it an edge. When thinking about the Galaxy Tab PRO or Galaxy Note PRO, if you don't have absolutely no need for a stylus, then go with the Galaxy Tab PRO, otherwise stick to the Galaxy Note PRO with all the things considered. The next best tablets in our minds is Lenovo Yoga Tablet 2 Pro 13.3. If you're considering a great tablet, why not go all the way with this, or one of the great HP Slate 17 and Samsung Galaxy View 18.4. What really got us excited is the integrated projector and dual-shooting premium sound system. There are several other prototypes in the making, ViewSonic announced a 22-inch Android tablet a couple of years ago and Panasonic showed its prototype 20-inch 4K tablet running Windows 8, but it's unlikely they'll hit the consumer market if there's an appetite to carry a ridiculously large tablet. Do you have 20 to 22-inch tablets? If you know of any good big screen Android tablets and would for us to include it here, please leave us a comment below. Below. Below.
